

Here's your inspection 
2016 CHEV COLORADO - Mileage: 34,316

Video Presentation

Reasons for my visit

1 Reasons (Click to hide details)

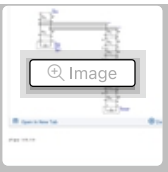

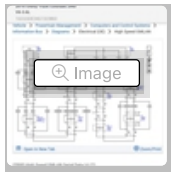

1. CS WAS DRIVING WHEN LOST POWER STEERING AND LIGHTS CAME ON - NO LIGHTS ON DASH AT TIME OF CHECK IN NO POWER STEERING NOISE CHECK AND ADVISE DVITechnician NotesRecommendations1.Work PerformedCompleted1.

Vehicle Health Report

1 Requires Urgent Attention (Click to hide details)

1. Engine Diagnostic Diagnostics

 Notes: Noticed vehicle had battery replaced recently, scanned for codes found codes for steering angle sensor not calibrated, performed steering angle sensor calibration. Test drove, could not replicate customer complaint. Test drove again and got traction light on and communication fault code with electric brake control module, scanner had communication with EBCM. Suspect an intermittent can bus fault. Recommend taking to dealer, might be under warranty

6 Requires Future Attention (Click for details)

21 Good Items (Click for details)

Tire Inspection

4 Tire Inspection (Click for details)
